EDUCATION

UNIVERSITY OF PITTSBURGH

GPA: 3.9/4.0

Bachelor of Science in Computer Science, Minor in Economics

2021-2025

- Achievements: Summa Cum Laude, Dean's List each semester

PROFESSIONAL EXPERIENCE

APPLE

Austin, TX

Software Engineer

Jun 2025 - Present

- Part of a pioneering effort to bring generative and agentic AI capabilities to both developers and business users across Apple, contributing to foundational tooling and adoption patterns now used organization-wide.
- Owned end-to-end development of an internal agentic chatbot serving business users and leadership across 5 LOBs, consolidating several dashboard systems into a unified natural-language interface for time-sensitive analysis.
- Led migration of a native macOS/iOS application to a web platform now used organization-wide, expanding access across the entire organization.

BNY

Pittsburgh, PA

Software Engineering Intern

Jun 2024 - Aug 2024

- Shipped production features across two teams using C# .NET, SQL, JavaScript, and Python within an Agile development cycle.
- Integrated firm-wide AI tooling into an existing application, delivering a feature that saved the business team ~10 hours per week; the impact drew attention from senior stakeholders, leading to an invitation to present the work to global leadership.

GRAYMATTER SYSTEMS

Warrendale, PA

Computer Science Intern

May 2022 - Jun 2024

- Designed and maintained a full MERN stack internal platform that standardizes administrative and financial processes, including secure authentication and authorization.
- Led development of a partner company's new product, which earned GrayMatter a featured role at the partner's annual conference and exposure to hundreds of new business prospects.
- Built and maintained the front end of an intra-company workflow application using HTML, CSS, and JavaScript.

FACET LAB

Pittsburgh, PA

Web Development Research Assistant

Aug 2022 - Mar 2023

Data Analytics Research Assistant

Dec 2021 - May 2022

- Ported an existing iOS application to a web platform delivering interactive English/Spanish literacy lessons.
- Analyzed large-scale student learning datasets in Python (Pandas, Matplotlib, scikit-learn) to surface behavioral patterns informing curriculum design.

PROJECTS

PERSONAL WEBSITE

maxmakins.com - github.com/maxm-akins/personal-site

- Designed and built a personal site as a richer alternative to a static resume; demonstrates frontend craftsmanship and deployment workflow.
